

Chronic Upper Back and Neck Pain

Most clients suffering from chronic upper back and neck pain are sensitive to their laundry products. They need to master the techniques in Truth Techniques I and test their laundry soap and fabric softener. The best cleaning laundry product, at the best price is Our Detergent. It is not a multilevel product. It is a citrus smelling liquid that also works well as a presoak. It is very concentrated and requires only ¼ cup per load. You can order directly at 800 747-3345. You may need to tell them Dr. Daniel referred you. Almost all commercial fabric softeners are toxic. Seven Generations makes a fabric softener that tests okay for many people. Many of our clients have had complete healing from upper back issues simply changing laundry products. Borax, available in most stores, tests positive for most people as well.
